

it.mds (Master Data Simplified)

Master Data – everybody needs it, nobody wants to handle it...

Introduction

With master data it is said that everybody needs it, but nobody wants to handle it. Too often master data rules and procedures are opaque, leading to unstructured, complex data distribution and consolidation. Data maintenance frequently lacks ownership or is reliant on key employees. Unfortunately poor master data quality leads to costly error-prone processes and reporting. it.mds is all about making things simpler and at the same time providing a better overview. With it.mds errors are minimized and quality can be maximized time-effectively.

Your Benefit

While SAP offers a flexible data model, companies struggle with master data maintenance. itelligence addressed potential gaps with our it.master data simplified (it.mds) solution, providing patented software technologies for rule-based data management.

it.mds can run on SAP HANA and supports business processes executed in SAP by proper master data with minimum effort. it.mds simplifies a series of internal working processes by managing, consolidating and harmonizing all master data in a single, central integrated solution.

Specification

The it.mds solution is delivered as a transport on the SAP ECC machine. No additional requirement is needed. The solution is developed in SAP ABAP OO and SAP Webdynpro for ABAP.

The solution is integrated in the SAP ECC using:

- SAP WF
- SAP authorisation concept
- SAP ABAP

SAP WD4A
Interfaces to other applications

Scope

Material Master
Purchasing Info Record
Vendor Master
Customer Master
Classification is embedded in the above mentioned master data objects

Requirements

Minimum SAP ECC 6.0 EHP5, SAP Netweaver 7.02 (EHP4 is only possible with some restrictions)

Price

on request
