

SAP Fiori (Wave V) Administration

SAPX11

Introduction

This course is designed to give participants a detailed look at common administration tasks and activities necessary to support the SAP Fiori solution. Participants will learn how to configure and customize the Fiori Launchpad, as well as how to configure and deploy SAP Fiori standard and customized applications. The participants will also learn about security within SAP Fiori in addition to learning valuable troubleshooting tips. The course covers SAP Fiori Wave V, so modifications to the administrative functions since SAP Fiori Wave II will also be covered.

Content

Duration: 3 days

- Introduction SAP Fiori Administration:
- SAP User Experience Strategy
