

S/4 HANA Architecture Workshop

We highlight the technological impacts of SAP S/4HANA and work with you to develop your SAP S/4 HANA system architecture.

Introduction

We support you in planning & evaluation of necessary activities to establish your SAP S/4 HANA system landscape

Your Benefit

- Insight into the SAP In-Memory Roadmap
- Individual planning of possible implementation scenarios
- Definition of the appropriate architecture OLTP / OLAP, high availability, disaster recovery, scale out, system replication

Specification

- Preliminary discussion on general conditions and objectives (by telephone)
- Recording the actual situation and existing requirements
- Rough analysis of existing business processes
- Potential Consideration on SAP HANA
- Preparation of the results for a presentation on C-level

Scope

On the basis of a telephone preliminary discussion, a structured preparation and follow-up and two half-day workshops on site, you will receive a comprehensive benefit analysis which shows you which goals of your company SAP HANA can particularly help you with. We will show you the most attractive application scenarios for you, and you will receive an assessment and a cost / benefit analysis with regard to the achievement of the objectives you have set. You will learn about the potential of SAP HANA and what it means to run your business processes

Requirements

Up to 2 technology experts as well as 2 functional S/4 consultants are at your disposal for the workshop meetings as well as the pre- and post-meeting.
