

it.configure - Dependency Workbench

Simplify Dependency Management

Introduction

The VC Dependency-Workbench from itelligence it.configure solutions simplifies and extends the maintenance of dependencies and variant tables. All dependencies can be maintained within one central Transaction.

Your Benefit

- Comfortable Handling allows faster incorporation and powerful maintenance
- The structural Environment ensures high acceptance and relieved the team cooperation
- The integration object by object allows the switch step by step to it.configure by existing configurations
- Performance: it.configure is faster because only relevant data are read
- Your tool Reduce total numbers of rules by using a hierarchy
- Transparent view, even by big rulebooks

Specification

- One central transaction with many functions for rule maintenance
- Characteristics or Combinations of characteristics of your product structure are organized as keys
- Maintain rules by the IF THEN principle
- Traceability of applied rules by extended trace function
- Multi-user concept
- Connected to SAP Standard by Variant Functions

Scope

- Software licence
- Delivery of Developments Transports for installation
- User-Documentation

Requirements

Using SAP ERP ECC 6.0 EHP 1 or higher
Maintenance Agreement obligatory
