

it.x-press - shipping process within SAP

Direct electronic SAP integration of courier, express and parcel service providers (CEP) and Freight forwarders.

Introduction

Does your company work with courier, express and parcel service providers (CEP) and Freight forwarders? it.x-press allows you to integrate your business processes with your CEP service providers and forwarding agencies within your SAP system in a simple and effective way. This can include calculating freight charges, selecting service providers, assigning and tracking shipments, as well as checking incoming invoices.

Your Benefit

- 100% integration of your transport service provider in SAP ERP / EWM
- Monitoring & control of your transport service provider in SAP
- Modular design of the solution it.x-press
- Speeding up your shipping processes by it.x-pack
- Higher cost control through accurate freight cost calculation
- Use of the existing standard functionality of SAP ERP Systems (XSI) for the configuration and tracking.
- Open architecture for technical adaptations and extensions.
- Broad portfolio of service providers and functions.
- Investment protection through adaptation to new SAP releases.

Specification

Scope

Due to the modular design of the solution it.x-press can be used according to your individual requirements and processes. Your individual consulting efforts and licenses will be determined in a 1 to 2-day workshop, where your exact requirements and processes are analyzed.

Requirements

SAP ERP 6.0 / mySAP ERP 2005 (earlier SAP release on request).

The solution requires a maintenance contract, which includes Help Desk Support and product updates.
