

it.trade Baseline Package

Address the details

Introduction

Growing competitive pressure and consolidation, changed purchasing habits and customer preferences, and shrinking margins are clearly putting wholesalers under pressure. Businesses like yours have a lot of details to address to help both supplier and recipient partners improve their market presentation with their product and service offerings.

Your Benefit

- Satisfies core industry business requirements
- Features flexible and incremental deployment options
- Supports unique order requirements
- Boasts holistic design that provides integrated business process flows

Specification

it.trade, a qualified SAP All-in-One solution from itelligence, is a comprehensive trade industry solution based upon the mySAP business application suite. The it.trade Baseline Package has been configured and functionally extended to satisfy core industry business requirements in support of the unique order fulfillment requirements of the trade industry.

Scope

- Holistic design utilizes a building block approach for flexible and incremental deployment options
- Delivers extensive integrated business process flows to support key business functions (e.g., accounting, cost management, sales, procurement, inventory and logistics)

Requirements

- Minimum SAP ECC 6.0 EhP 0
- All published pricing is estimated. Actual pricing is determined during intelligence discovery and proposal process
- The intelligence proprietary item is used as a project accelerator, and implementation services are included in pricing.
- The solution does not require a software maintenance contract. Help Desk Support and product updates are on a time and materials basis.

Variants
