ETL Process

ETL – The Extract, Transform, Load Process Training

Introduction

This 1 day training course is aimed at IT professionals who are involved in the design, build or maintenance of a data mart or data warehouse, and need to understand the techniques involved for the ETL process.

Content

Duration: 1 day
- The importance of connecting correctly to source and target
- Movement of data
- Transforms and functions
- Generation of a central library
- Managing and scheduling of jobs
- Data profiling
- Metadata Reporting - is it important?

Goals

To enable the delegate to implement an ETL (Extract, Transform and Load) process.

Prerequisites

To be successful, delegates should have a basic understanding of relational database concepts such as joins, tables primary keys, attributes and look-up tables.

Applicable Certification

This training course is designed for Data Architects.
